

Time: 10/15 Monday 5-7 pm

- Discussed what we needed for our demo next week
  - Basic functionality for viewing recipes
  - Website infrastructure complete (navbar, different pages, etc..)
  - Ability to pull up website using a URL (not just deployed on our own machines)
- Things we need to do to make this a reality
  - Set up Heroku to move towards deploying in the cloud
  - Create our recipe viewing page
  - Create & structure database
  - Add dummy info into this database for testing purposes
  - Link the recipe viewing page with the database
  - Add searching if possible
- What we did this meeting
  - Kyle and Harsh worked on setting up Heroku
  - Nas and Nick worked on setting up database
  - Jeff and Will worked on setting up the recipe viewing page
