

Time: 10/29 Monday 5-7 pm

- Progress over last week
  - Finished profile page template
    - Not finished with settings (editing profile information, privacy, etc)
  - Started static web page element work (navbar)
  - Got Heroku to work
  - Started to make basic API integration layer
- Next week agenda
  - Finish up integration layer
  - Finish up with static web page elements
  - Profile page will be ready
- Each person's jobs
  - Will
    - When database is done I'll start recipe view page
    - Continue work on static web page elements
  - Robert
    - Help Harsh w/ integration layer
  - Jeff
    - Finish profile settings template
  - Nas
    - Connect HTML and CSS to the Heroku files in order to display current website, add dummy data into database after upload page works
  - Harsh
    - Need to still work on Integration layer (Node.js) - put and run this in Heroku, then Will and others can use jQuery Ajax calls to the API
    - Also research on carrying user session variable to different pages
  - Kyle
    - Research and possibly add google sign-in
- Roadblocks
  - N/A this week
