

Time: Monday 5-7 pm

- Created Google Drive folders/documents for the milestone and team meetings
- Created GitHub repos for milestones and meeting logs
 - Shared this with everyone + TA
- Discussed recipe sharing vs geotracking idea
 - Overall difficulty of implementing each idea into a real product
 - Recipe idea has room for adaptability, can add a lot more features to make it more fleshed out if needed
- Decided on recipe idea
 - If possible we'll add a feature where you can put in what ingredients you have and it'll suggest popular recipes that have the same ingredients.
- Worked on Milestone 1
 - Decided we wanted to keep using Slack
 - We can also integrate GitHub into Slack
 - Discussed risks
 - Found that we're a little weak on the frontend
 - Discussed the how's of our project
 - Python with Flask on the backend
 - PostgreSQL for database
 - Angularjs for frontend
 - REST API
 - Integration level w/ Node.JS
 - Express Module Maybe?
 - Bootstrap for aesthetic features on frontend
 - Discussed Development Method
 - Decided on Agile
 - Was recommended in class
 - Members on our team have experience with it
- Submitted Milestone 1
